Deputy Director General

S. Berdnikov

No. R-I-234

Validity Conditions
of Letter of Conclusion No. R-I-234 dd. October 20, 2025
on preparedness to manufacture the product of safety class 3
with QA2 quality assurance category for the Rooppur NPP,
issued to LLC SATOMS

1 Scope of Activities

The scope of activities permitted by this Letter of Conclusion to LLC SATOMS (hereinafter referred to as the Applicant) covers the manufacture of Sampler devices, Sampling heat exchanger (hereinafter referred to as the Products) of safety class 3 with QA2 quality assurance category for the Rooppur NPP.

2 Regulatory and Procedural Requirements

The Applicant shall carry out the activity applied for with due regard to the requirements of:

2.1 Safety rules and regulations of the Russian Federation in the field of atomic energy use, state standards of the Russian Federation, branch standards, plant standards, other regulatory documents, and production documentation used while fulfilling the activities applied for, establishing the requirements to quality and reliability of the manufactured Product.

2.2 JSC "VO "Safety" procedural documents pertaining to the field of the activity applied for.

2.3 The quality management system, as well as general and specific quality assurance programs while carrying out the activities permitted by this Letter of Conclusion.

The requirements of the general quality assurance program shall be fulfilled when developing the specific quality assurance program for the Rooppur NPP.

3 General Requirements

The Applicant shall:

3.1 Provide the authorized representatives of JSC "VO "Safety" at the Applicant's site with the required conditions for conducting inspections, including communication services, etc.

3.2 Inform the authorized representatives of JSC "VO "Safety" about the commencement (stage) of activities on the manufacture of a specific Product to be manufactured as per individual set of engineering documentation and technical specifications before starting the manufacture of the Product.

3.3 Obtain the JSC "VO "Safety" Conclusion following the engineering documentation review prior to starting the manufacture of the Product.

3.4 Develop the Quality Plan and duly agree upon/approve it before starting the manufacture of the Product.

3.5 Inform the authorized representatives of JSC "VO "Safety" in advance about inspections in control points of the Quality Plan.

3.6 In case there are deviations from the requirements of the federal safety rules and regulations of the Russian Federation in atomic energy use during manufacture of the Product, notify authorized representatives of JSC "VO "Safety" about these deviations.

3.7 Maintain production and process potential, number and skills of the personnel at the level sufficient to ensure good quality of the activity applied for. Perform periodic qualification testing of specialists carrying out the activity applied for within the period required by the regulatory documents.

3.8 Ensure efficient functioning of the system for selection and evaluation of Suppliers/Subcontractors, and system for assessment of the conformity of the equipment/Product being purchased to quality and safety requirements.

3.9 If the implementation of contracts may cause a change to the scope of the activities applied for and to the established requirements, these Conditions shall be revised.

3.10 Correct the deficiencies identified by the authorized representatives of JSC "VO "Safety" related to the detected non-conformities of the activity applied for with the requirements of the regulatory documents.

4 Requirements for Information and Reporting

The Applicant shall:

4.1 Submit information, materials and documents necessary to assess the implementation of these Conditions to the authorized representatives of JSC "VO "Safety".

4.2 Submit the copies of the relevant administrative documents to JSC "VO "Safety" within 30 days from the date of obtaining the Letter of Conclusion:

- on enactment of the Letter of Conclusion;
- on appointment of the officials responsible for the fulfillment of these Conditions.

4.3 Inform the authorized representatives of JSC "VO "Safety" about the scope and nature of the work planned for the next quarter.

4.4 Provide JSC "VO "Safety" with an annual report on the range and scope of works accomplished as part of the activity applied for, containing information on quality assurance of these works, by the 10th of February of the year that follows the reporting year, as well as with a final report to be submitted by the expiry date of the Letter of Conclusion.

4.5 The Applicant shall provide JSC "VO "Safety" with the information on modifications to materials and documents justifying the application for obtaining this Letter of Conclusion within 10 days from the date of introducing the aforesaid modifications.

5 Additional Conditions

5.1 These Conditions may be altered by request of the Applicant or on the initiative of JSC "VO "Safety".

5.2 The Letter of Conclusion can be suspended or terminated in case the Applicant violates safety standards and regulations in the field of atomic energy use, guidelines, Validity Conditions of this Letter of Conclusion, as well as in case of termination of the documents which are among the prerequisites for obtaining the Letter of Conclusion.

5.3 In case the Applicant initiates alteration of these Validity Conditions of the Letter of Conclusion, the Applicant shall submit to JSC "VO "Safety" an application with justifying documents attached hereto.
